Hi, Ken:

I'm checking on the status of the sampling that Vulcan agreed to undertake - can you let me know what it is? If it has not yet been performed, it probably makes the most sense to just wait and coordinate it with our regular event in the first 2 weeks of April, so we can compare the water levels directly.

Thanks!

Regards,
Kelly Manheimer

Subject: RE: Former Hewitt Pit (Vulcan Materials Company) Planned Groundwater Sampling Revision to point #4

Hi, Ken:

Per our conversation a few minutes ago, I understand that Vulcan will be conducting the sampling that EPA has requested. At this point, because we missed the timeframe in December for the water level measurements, we are requesting only the following wells to be sampled:

<u>Well ID (Regional)</u>	<u>Alternate Well ID</u>	<u>Year Constructed</u>	<u>Total Depth (feet bgs)</u>	<u>Screened Interval (feet bgs)</u>
4909F	V14HEW9F	1987	285	225-285
4909C	V14HEWC9	1984	500	232-490
4899	V14HEW99	1984	285	120-286

We have previously provided answers to questions your consultant had (see below), but if there are any remaining questions, please have your consultant coordinate with John Lindquist, who is the CH2MHILL Project Manager, with copies to me of all emails. Please let us know when the sampling will occur. The specific analyses requested are below:

<u>Analysis</u>	VOCs	1,2,3-TCP	Hexavalent Chromium	Perchlorate	Dissolved Metals (including cations and silica)	1,4-Dioxane
Analytical Method	Mod CLP for low/medium	EPA 524.2 SIM	EPA 218.6	EPA 314.0 or EPA 6850	CLP SOP 507 (Full list including: cations, iron, manganese)	SW8270 SIM

	VOA					
--	-----	--	--	--	--	--

Please also take water level measurements from each well.

As far as timing is concerned, I would appreciate if the sampling could occur as soon as possible, to be as close as possible to the original event (which was in December).

I appreciate Vulcan's cooperation on this event.

As a head's up, EPA will be conducting our next regular sampling event the first two weeks of April. Since we missed the water level event in December, I will likely request access to take water levels only during this event. I am still determining the exact coverage needed for the next event, however, and will let you know as soon as I can on the specific wells needed.

Thank you, and have a nice day!

Regards,
Kelly Manheimer
